A WEBSITE PROJECT

Student Assignment and Deadline Manager

Every assignment and submission date, in one simple place. Never miss a deadline again.

The Problem

Students often forget submission dates because they juggle many assignments, projects and practical files. There is **no single place** to see all their work and deadlines.

This project builds a website that keeps everything in one place.

Goals

- Manage all assignments in one place
- Remind students about upcoming deadlines
- Track pending and completed work
- Add, edit and delete assignments
- Organize work by subject
- Manage time and finish before deadlines
- Keep management easy and simple

What the Website Does

- Add name, subject and submission date
- Edit or delete assignments
- View submission dates of all work
- Progress: Pending, In Progress, Completed
- Organize assignments by subject
- Priority: High, Medium, Low
- Dashboard: total, pending, completed

How It Should Work

- Easy to use, clean and attractive design
- Works on laptops, computers and phones
- Saves assignment details properly
- Loads quickly and runs smoothly

Tools Used

HTML structure	**CSS** design	**JavaScript** interactivity
VS Code code editor	**LocalStorage** saves data	**Safari** run and test

About the Project

Students enter an assignment's **name, subject, description and date**. The dashboard shows each as pending, in progress or completed, with totals and upcoming deadlines. Edit or delete anytime, stay organized and never miss a date.

Project Plan: 8 Steps to Final Submission
